

FLEX RACEWAY SYSTEM

Modular Floor-Based Power and Data Distribution System

FEATURES & BENEFITS

Up to 75' in total length.

High Density Power & Data Capability.

- Provides 4-circuit power system with quad receptacle devices and optional av/data capabilities

Re-Configurable.

- Location of power can be moved after installation with modular power hubs

Furniture Feed.

- Hardwire device can be used in place of a Receptacle device for hardwiring to furniture

Entrance Options.

- Wall:** In or On-Wall Entrance options, or transition from 2400® or 4000® Series raceway systems
- Open-Space:** 4" Poke-Thru Entrance supports power and data from open spaces

The Flex® Raceway System is an innovative floor-based power and data distribution system for interior spaces. The system is comprised of pre-wired, interconnecting Powertracs and Power Hubs that feature expanded data capacity and interchangeable power devices that can be hot-swapped or completely removed at any time. Easily adapt power, data, and AV connectivity to suit the needs of any space.

2 INSTALLATION OPTIONS

*Under-carpet installation
- ADA Compliant*

On-floor installation

*Power and Data Device with
Power Hub*

designed to be better.

EXPRESS KIT RACEWAY SYSTEM

Grab-and-Go
Single Point-of-Use Raceways

Connectrac Express Kits accommodate a single power and data point in a prewired raceway solution starting at a wall. The single-circuit design is ideal for smaller conference rooms and podiums – a perfect fit for both retrofit and new construction applications.

2 INSTALLATION OPTIONS

Under-carpet installation

On-floor installation

FEATURES & BENEFITS

Up to 15' in total length.

Power & Data.

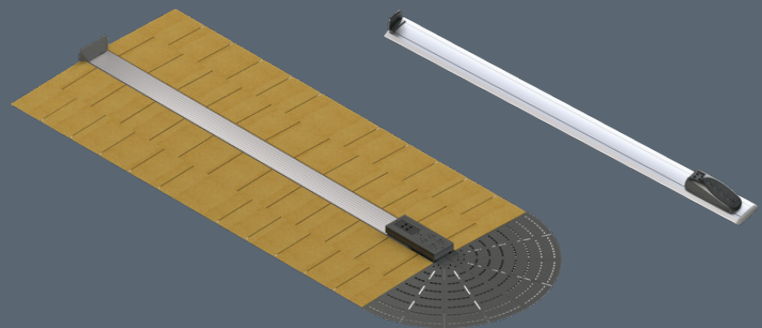

- Includes 1 pre-wired quad receptacle (single circuit) and supports up to 4 keystone modules (data or AV)

Raceway Wall-Feed.

- Feed power and data from the wall or transition from 2400® or 4000® Series raceway systems

ADA Compliant.

- Both installation options, under-carpet and on-floor, are ADA compliant

Connectrac Express Kits	Type	Part Number
